

# AIR CONDITIONING SYSTEM

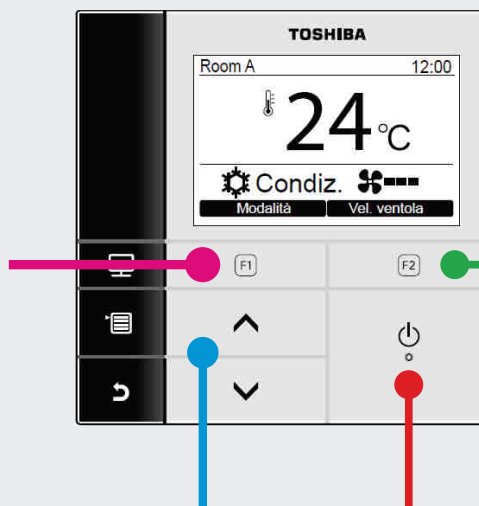

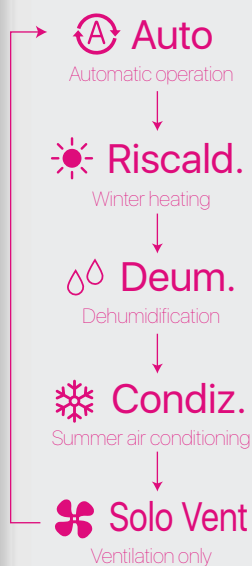

LA TENUTA  
AGRITUR apartments

Each apartment is equipped with an autonomous air conditioning system. A single panel controls both summer cooling and winter heating.

**Please use the device responsibly.**

With each button press, the operating mode changes following this pattern:

Press to adjust the desired temperature:

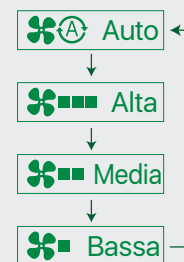

- increase
- decrease

Press to start or stop the air conditioner

**I/O**

In case of error, press to restore normal display

with each button press, the ventilation speed changes following this pattern:

Please check with staff for any scheduling requirements.

You are requested to use the air conditioning system with all doors/windows shut.

Kindly note that provincial regulations require, during the winter period, compliance with certain rules, including one that prohibits indoor temperatures exceeding 20°C when using heating.

Please consult the "Note for a responsible use of the heating system".
